41. (Twice Amended) A photographic apparatus comprising:
a recording section capable of recording, on a recording medium, moving pictures
and still pictures;
a controller for controlling the photographing apparatus, which is operated by a
voluntary operation of an operator, to selectively carry out a plurality of shooting and
reproducing modes, said shooting modes including a mode in which the moving picture is
recorded on the recording medium and a mode in which the still picture is recorded on the
recording medium, said reproducing modes include a mode in which the moving picture
recorded on the recording medium is reproduced, a mode in which the still picture
recorded on the recording medium is reproduced, and a mode in which the still picture is
reproduced out of the picture recorded as the moving picture on the recording medium; and
an aspect ratio selector for varying, in any of the modes in which the moving
picture is recorded, an aspect ratio of the picture.
